*** Notes:**

1.) The timelines provided above are estimates based on both information provided by channels and historical data that MTSN tracks internally. While these timelines are not guaranteed, MTSN is committed to updating payments and performance data as soon as they are received from the channel.

2.) Some channels conduct adjustments for revenue and costs from previous months. These adjustments, known as "true-ups," may result in the appearance of small charges or credits in the current month's reports, even if there are no associated revenue transactions or advertising impressions.

3) Flat Fee Deals: Flat Fee deals encompass a range of payment structures, typically disbursed every 6 months. The terms of these deals vary and may involve licensing durations, such as 2-6 months, 1 year, 3 years, etc. The payment date in this sheet reflects the date and month when payment is made to producers. Importantly, this date may not align with the month in which the revenue was reported (corresponding to the licensing dates specified in the terms of the deal).
